*Allowable Subject Matter*

1. Claims 1 and 2 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Kaylor et al (US 2003/0025791) discloses a mobile surveillance system comprising a platform having rotating wheels; the platform having means for attaching independent electrical power source; the platform having a method of attaching a vertical mast base that receives and supports a vertical mast; the vertical mast extending to various heights. Kaylor, however, fails to further teach that the platform having handles mounted there-under enabling the platform to be carried by hand; means for attaching elastic fasteners; and that the vertical mast being joined with a horizontal cross member for accommodating the mounting of wireless networking devices.

Regarding claim 2, none of the prior art of record fairly teaches or suggests a method of performing a wireless networking site survey comprising the steps of: providing a mobile structure for affixing and transporting wireless networking access points, antennas, uninterruptible power supplies; transporting the structure to a site in a disassembled form; assembling the structure at the site; attaching wireless networking devices to the structure; attaching uninterruptible power supplies to the structure; supplying electrical power to the wireless networking devices by plugging them into the uninterruptible power supplies; rolling the structure around the site while performing the site survey; and disassembling the structure after the site survey and transporting the structure away from the site.
